RCRA RECORDS

Dear Ms. Kump-Mitchell:

Enclosed is the quarterly report for the quarter ending March 31, 2007 as required in paragraphs 91 through 94 of the Corrective Action Abatement Order on Consent, Order No. 99-HW-002 (AOC). The following summarizes the activities completed during the quarter.

Description of Work Completed During the Quarter:

Modine submitted a letter to MDNR disputing the MDNR's position on the soil issue and beginning the dispute resolution portion of the AOC. As part of the informal negotiation between MDNR and Modine, the report summarizing the subsurface soil investigation was submitted to MDNR. A meeting was held regarding the project (as part of the informal negotiation period) between MDNR and Modine. In the meeting, MDNR stated that they will review all the past data again and internally discuss further options.

Due to timing concerns for the informal negotiation period, a letter modifying the AOC was sent to the Attorney General's office for approval and signature. The letter allows the extension of the informal negotiation period for up to 6 months in 1 month increments. The letter was approved and the AOC amended to reflect this change. The informal negotiation period was then extended until April 19, 2007.

A letter from MDR was received on March 30, 2007 requesting additional information on the reconstruction phase (completed in 1997) for the site.

Summaries of Findings, Data, Etc.

The final report summarizing the results of the under the building investigation was submitted to MDNR on January 26, 2007. Results showed very limited, isolated instances of contamination.

Summaries of Problems or Potential Problems and any Corrective Measures Implemented:

No problems were encountered during the quarter.

Projected Work for the Next Reporting Period:

The anticipated work to be completed is: submitting the additional information from the site reconstruction to MDNR, closing out all the remaining soil issues, completing the groundwater final report and completing the associated groundwater EI.

Instances of Non-compliance with the Requirements of the Order:

There were no known instances of non-compliance with the requirements of the Order during the quarter.

If you have any questions on this report, please contact me at (262) 636-1649 or at the letterhead address.

Sincerely,

Thomas S. Sanicola
Principal Environmental Engineer
